

KIRKLARELI MUNICIPALITY

EXPLANATORY NOTE

Kirklareli Municipality leased the Karahıdır Korusu B Type Recreation Area on Block 677, Parcel 1, which is the area where the project will be implemented, from the Republic of Turkey General Directorate of Forest Management on 27.01.2015. The validity date of the contract is 29 years. The size of the area is 105.5 hectares. Turkish and English versions of the Agreement are available in the annex documents.

Since Karahıdır Grove Type B Recreation Area has a very large area, the area has been divided into stages. As the first stage, the section planned to be built within the project budget covers 516 acres of the promenade area. " Karnobat and Kirklareli Investing in the Future" project will be implemented in this area.

All application map works, infrastructure and ground leveling in the project area will be carried out and delivered by Kirklareli Municipality.

Within the scope of the Project, a Basketball Court and Tennis Court will be built in Karahıdır Grove. However, the infrastructure and foundation concrete of the Tennis Court (37 meters x 19 meters) and Basketball Court (32.65 meters x 17.24 meters) in the project area was previously constructed by Kirklareli Municipality. Therefore, the technical specifications do not include the infrastructure costs for the foundation of the Basketball Court and Tennis Court.

Solar paneled lighting will be used in the project. These solar panel lights will be placed on the poles of the fence of the basketball court and tennis court. In the project area, 6 solar panel lights will be used in the basketball court, 6 in the tennis court and 3 in the area where the children's play group is located.

Derya BULUT
Mayor of Kirklareli
